Subject: Limetree Bay Terminals - time-sensitive

Hi, Pete. As you know, Henry Darwin has asked Rob Tomiak, the head of the Office of Federal Activities in the Administrator's Office, to closely track the progress being made on the issues that EPA and our partners, including DPNR and the Corps of Engineers, need to resolve with Limetree Bay Terminals in order for the restart of the refinery on St. Croix to occur. At Rob's request, we have put together a tracking table (see attached) and will be updating it on a weekly basis. Rob has also convened a working group of a number of folks in ORC, CASD, DECA and CEPD, along with the affected offices in HQ, and has scheduled weekly calls of the group, the first one being this Thursday.

While the current draft of the table is preliminary and has some placeholders, and Rob understands you would like to see it before it's sent down to HQ, he is strongly requesting that I send it to him by no later than COB tomorrow (Wednesday) because he owes Henry the first weekly update this Friday. Rob assures me that the table will just be for the working group's use and that when he needs to provide status reports to Henry, he will prepare a summary for him rather than sending Henry the table itself, which will be a more "in the weeds" document.

So, please let me know if we can send the attached table to Rob. Thank you.

Paul
